EDUCATION

Bachelor of Science in Computer Science, Minor in Mathematical Sciences **May 2027**
Florida International University Honors College; GPA: 3.5 **Miami, FL**

EXPERIENCE

Broward County Enterprise Technology Services | Plantation, FL **November 2025 – Present**
Cyber Security Intern

- Performed endpoint security and Data Loss Prevention (DLP) scans using Absolute Security to identify security risks, unencrypted devices, and potential data exposure, escalating findings to security leads.
- Supported enterprise vulnerability management and remediation using Qualys across ~20 devices, following up on remediation efforts and rescans for roughly 100 vulnerability findings and helping clear the existing vulnerability backlog.
- Created custom Absolute Security reports and device groups to improve endpoint visibility, including identifying inactive HIPAA-regulated devices and systems where CrowdStrike was not being detected.
- Utilized Windows Active Directory, Group Policy, Windows Registry, and PowerShell to investigate security issues and support endpoint administration.
- Assisted in the planning, testing, and deployment of enterprise encryption software supporting over 400 county employees.
- Documented and demonstrated Proofpoint ZenGuide phishing campaign software to support organization-wide security awareness initiatives.
- Contributed to the redesign of cybersecurity awareness and Generative Artificial Intelligence training completed by over 2,000 county employees by making technical concepts more interactive and accessible to non-technical users.

Panera Bread | Coral Springs, FL **May 2022 - August 2024**
Shift Team Lead (Line Cook)

- Led and trained team members during high-volume shifts, maintaining quality standards, coordinating operations, and optimizing workflow in a fast-paced environment.

PROJECTS

Wazuh SIEM Homelab | Personal Cybersecurity Team Project **Spring 2026**
Cyber Security Intern

- Configured a Wazuh SIEM environment in a virtualized homelab using a proxmox VM to monitor endpoint security events and identify potential vulnerabilities across monitored devices.
- Connected and monitored multiple endpoints while troubleshooting networking, virtualization, and agent connectivity issues to establish reliable security monitoring.
- Used the project to gain hands-on experience with SIEM concepts, endpoint monitoring, vulnerability visibility, and security event analysis.

SKILLS

Programming: Python (Industry certified), HTML and CSS (Industry Certified)
Tools & Platforms: Absolute Security, Knowbe4, Visual Studio Code, Microsoft Office Suite, Proofpoint ZenGuide, ServiceNow, Qualys
Cybersecurity: Phishing Campaigns, Data Loss Prevention (DLP), Endpoint Security, Linux Fundamentals, PowerShell, Active Directory, Group Policy, Vulnerability Management, Vulnerability Remediation, Security Awareness
Technical & Professional: Technical documentation, access control management, data analysis, team collaboration

CERTIFICATIONS

CompTIA: Security+ – June 2026 – June 2029
AWS: Cloud Practitioner – In Progress
Information Technology Specialist: JavaScript; Python
Project Management Institute: Project Management Ready

EXTRACURRICULAR INVOLVEMENT

National Society of Black Engineers (NSBE) | Florida International University **Summer 2026 – Present**
Finance Chair

- Collaborate with E-board members on organizational budget decisions and financial planning.
- Support sponsor outreach and relationship-building efforts with companies and organizations to secure resources for chapter initiatives.
